
Physical Properties Magnetically Ordered Crystals Turov

the anisotropic properties of magnetically ordered gel - the physical properties of magnetically ordered agarose gel were measured to elucidate its magnetically induced network structure. 2. experimental the raw materials used were agarose type ii with ... **magnetically ordered fcc structure at the relaxed grain ...** - volume 81, number 20 physical review letters 16 november 1998 magnetically ordered fcc structure at the relaxed grain boundaries of pure nanocrystalline fe **black-white symmetry; ordered magnetics; anisotropy of ...** - anisotropy of physical properties in magnetically ordered crystals behaviour of tensors under space, time, and combined inversion dependence of property tensors on the point group of the crystal **large magnetoelectric coupling in magnetically short-range ...** - large magnetoelectric coupling in magnetically short-range ordered $\text{Bi}_5\text{Ti}_3\text{FeO}_{15}$ film abstract multiferroic materials, which offer the possibility of manipulating the magnetic state by an electric field or vice **university of groningen magnetically induced ...** - 4 in the magnetically ordered state below $T_N \sim 43$ k remains controversial. here we present the results of detailed studies of specific heat, magnetic, and dielectric properties of Bi_2CuO_4 single crystals grown by the floating zone technique, combined with the polarized neutron scattering and high-resolution x-ray measurements. down to 3.5 k our polarized neutron scattering measurements ... **low-temperature physical properties of single-crystalline ...** - intriguing physical properties with anomalous behaviours in magnetically ordered states. here, we report on the here, we report on the formation and the bulk physical properties of two tetragonal compounds EuCoGe_3 and EuRhGe_3 , studied on **magnetically ordered transition-metal-intercalated wse₂** - magnetically ordered transition-metal-intercalated wse_2 ... we investigate the electronic and magnetic properties of transition-metal-intercalated tungsten diselenide (wse_2) using density functional theory. we find that intercalation compounds with composition of $t/4 \text{ wse}_2$ (t is an iron-series transition-metal atom) exhibit substantial magnetic moments and pronounced ferromagnetic order ... **the effect of ferromagnetism on the equation of state of c ...** - magnetically ordered and high-pressure non-magnetically ordered states; at 0 k the ferromagnetic transition was found to occur at about 60 gpa. in the high pressure, non-magnetically ordered regime at 0 k the material may be **university of groningen dynamics of photo-excited ...** - to a variety of ordered phases of charges, orbitals, and spins states [1], which in turn drives emergent properties ranging from colossal magneto-resistive phenomena [2] **journal of applied physics ,1 2006 - researchgate** - structural dependence of some physical properties of the Ni_2MnGe heusler alloy films v. a. oksenenko, l. n. trofimova, yu. n. petrov, and y. v. kudryavtseva institute of metal physics, national ... **magnetically responsive nanostructures with tunable ...** - specific environmental changes and adjust their physical properties in a predictable manner, making them highly desired components for designing novel sensors, intelligent systems, and adaptive structures. magnetically responsive structures have unique advantages in applications, as external magnetic stimuli can be applied in a contactless manner and cause rapid and reversible responses ... **superconductivity in magnetically ordered RuIrSrGdCuO ...** - we have performed a systematic study of the structural, transport, and magnetic properties of polycrystalline samples of the magnetic superconductors $\text{Ru}_1\text{Ir}_x\text{Sr}_2\text{GdCu}_2\text{O}_8$; $x = 0, 0.02, 0.05, 0.10, \text{ and } 0.15$. **new non-magnetically ordered heavy-fermion system CeTlGe** - since no further physical properties were reported and since the true ground state remained unsettled, we decided to investigate more precisely the low temperature properties of **magnetic and ferroelectric properties of multiferroic Rm_2O_5** - 3 with magnetically active elements [2], the hexagonal abO_3 group and the Bamx_4 material group. an example of an extensively studied system is BiFeO_3 [3] ($T_N = 643$ k and $T_C > 1100$ k). a thorough review of work in this field has already been made by Fliebig [4]. cross-correlation of the magnetoelectric (me) effect, such as the effect on dielectric properties by application of a magnetic ... **doping effects of cr on the physical properties of BaFe_2 ...** - doping effects of cr on the physical properties of BaFe_2 1.9 ... the magnetically ordered temperature (néel temperature) T_N is strongly associated with the ordered moments M . both of them are suppressed upon doping, where M is reduced further upon entering the superconducting state, and finally disappears around the optimal doping with finite T_N above the superconducting transition ...
